

Purpose of Evaluation:

The pre-training evaluation is an assessment of Field Service Engineer s' (FSE) knowledge prior to participating in any training. It is not a pass or fail exam and will not be identified as such. It allows us to evaluate what topics need reinforcement during training or what topics can be omitted. After review of your answers, the MTS team will identify and discuss with you and your mentor what additional actions should be taken. If you have any questions please talk to your mentor.

NOTE: This text can be anything you want. This is just some verbiage I put together for this demonstration.
